

# Visiting Centre 33

We are so pleased to be back open for drop-ins and appointments and are working hard to keep our hubs as COVID-safe as possible

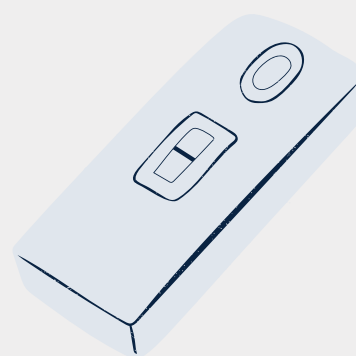

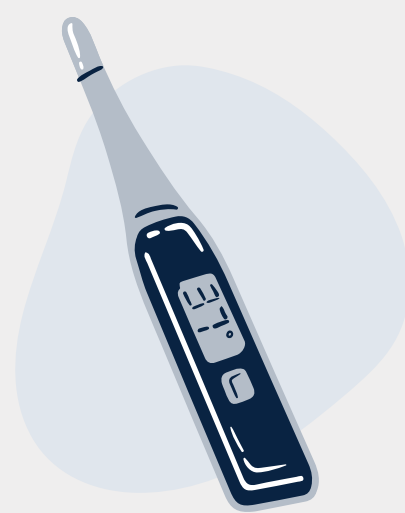

## Before you set off

It is important to us that you feel safe. Please talk to us if you are feeling anxious about coming in.

We hope you're **feeling well** for your visit. Please ensure you have tested negative with an LFT or PCR test if possible.

Please come back another time or ask us for some remote support if you have any COVID-19 symptoms.

We will be ventilating our rooms so wear **warm clothes**.

## When you get here

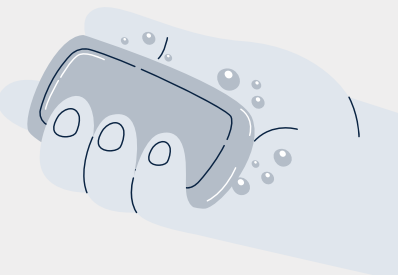

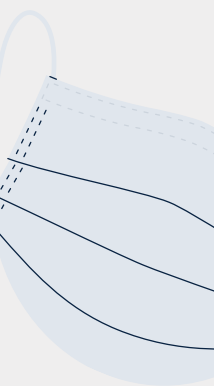

Please wear a **mask** if you are able to (we have plenty if you need one).

There is **hand sanitiser** for you to use as you come in.

The staff members you see will all be wearing masks.

You can **wash your hands** and use the toilet while you are in our buildings.

We are taking steps to keep everything as clean as possible.

Unfortunately we don't have lots of **waiting space**.

Please arrive on time as there is nowhere to wait for long periods of time.

We also don't have space for friends and family to wait either.
